[LuyoloLuja.github.com](https://LuyoloLuja.github.com)

An entry-level Full Stack Web Developer with love of art, I am stickler for details as I believe coding is a form of art. I see myself in a position where my skills will be useful and developed, to be successful and be part of an organization/company that will upskill and enable me to improve my capabilities.

---

## Education

---

### CodeX / Agile Full Stack Web Development

2020

### Richfield Graduate Institute of Technology / Higher Certificate in IT

2017 - Not Completed

I could not complete the qualification because of financial reasons

### Richmond High School / Grade 12

2015

IsiXhosa Home Language, English First Additional Language, Mathematical Literacy, Life Sciences, Geography, History, Life Orientation

---

## Skills

- HTML 5 & CSS 3
- Javascript
- Git & Github
- ExpressJS & NodeJS
- Postgresql & SQL
- Unit Testing - Mocha & Chai
- Deployment - Heroku & GitHub Pages

---

## Projects

---

2020 - Mental Illness Awareness - <https://mentalillness.herokuapp.com/>

Github Repository:

<https://github.com/LuyoloLuja/mental-illness-awareness>

Web app to raise awareness in three different mental illnesses, namely Bipolar, Depression and Schizophrenia. This app was built using express-flavoured NodeJS, with Handlebars for templating, and a PostgreSQL database. It was deployed to a Heroku server using Git.

This was a team project for the CSIR Hackathon; my contributions were the front end design and database connections.

2020 - **Registration Numbers Webapp** -  
<https://luyoloregnumbers.herokuapp.com/>

Github Repository:

[https://github.com/LuyoloLuja/registration\\_numbers\\_webapp](https://github.com/LuyoloLuja/registration_numbers_webapp)

Web app to enter and filter registration numbers for Cape Town, Paarl & Stellenbosch . This app was built using express-flavoured NodeJS, with Handlebars for templating, and a PostgreSQL database. It was deployed to a Heroku server using Git.

This project's front end design and back-end were done by me.

2020 - **Phone Bill** - <https://luyololuja.github.io/dom-intro/>

Github Repository: <https://github.com/LuyoloLuja/dom-intro>

This app allows users to check different prices of phone bills, e.g calls and sms . This app was built using HTML, CSS, Javascript and the Document Object Model.

This project's functionality (Javascript) was done by me.
